

Hello,

I received your invitation when entering the new year. I'm fine. I am happy to participate in located in the People's war on Freedom against the oligarchy and imperialism.

I share my cell with two of my comrades. There are no one else that I can call around (There is no one else that I can call on my left and on my right side). But I'm not alone. Although there are walls and kilometers between us, I share the same enthusiasm with the feelings as the same you feel. With thee feelings, I greet you with respect and love. Your invitation became a new year's gift to us.

Yes..we entered a new year.. I entered my 15th year in isolation. I have 23 years of captivity in total. This corresponds to 38% of my life and 50% of my revolutionary life. I made this interpretation while writing these lines to you. How these years passed, was really that much, I am so surprised. I did not realize that years have passed quickly. That 23-years' time frame includes fascist junta years of "September 12th". That includes Buca, Umraniye, 19-22 December period, years of isolation in F-Type imprisonment.

So to speak, I faced with grim reaper (Azrail) a few times and he was the loser from the encounter. As opposite, it was my gain. I'm a winner in every respect. I am obliged to whom or what for being conqueror? Of course, the thoughts that secure the future achievement of good days, a strong ideological and political line, a leadership with steely discipline, history that shaped by our hero martyr, a revolutionary will....

I love this history, our history. We proceed with our struggle against isolation. That enemy is our enemy. That represents the oligarchy and imperialism, working on their behalf. That try to destroy your thoughts. They never gave as the Yuruyus magazine over the past year. They confiscated the magazines. I do not write other attacks on Isolation because that take more space. The embargo is sufficient to show the imposed size of isolation. The same magazine does not constitute a drawbacks in Ankara, Izmir, Istanbul and other F-type prisons, where those are given to prisoners, but somehow it endanger the security of Adana F-Type prison.

So it is specific to Adana, a special case. What is wrong with Adana, what is its difference from other cities? When asked this, the Incirlik base of US comes to our minds. Incirlik base is just 500 meters from here. Interestingly, the publication ban began after sacrificing actions made against to the US Embassy in Ankara.

The Isolation conditions are rough, but we have passed the circle of fire. We are not frightened off by these cheapest policies. We are honored that our thoughts in publications are a threat to them. Even this war goes on with the ideological, political, cultural, and military plan as a whole, they would say that the most important one is the ideological struggle. In this sense, their fear in face of revolutionary will is an honor for us.

With this honor, the bans and oppressions have no effects. Eventually, we will win. With these confidence, I greet all the delegates, wish success, who attended the symposium.

Sincerely,

January 30, 2015

Haci Demir

Adana F Type Prison
