

Hello.

Isolation is the greatest attack on those who resist imperialism and do not give up independence, freedom, honour and hope. We greet the hearts uniting in the Symposium with our carnations, those who resist isolation with our belief in free tomorrows.

The imperialists, collaborators and the killers created, built up and supported by them are continuing their attacks using gangs. Attacks using isolation, sieges and corruption continue. Those who resist imperialism are hunted by means of "prices on their heads".

With the belief embodied in our Great Death Fast Resistance of 2000-7, and with our spirit of sacrifice, we call on all who resist, the peoples of the world, and with the strength that has resisted isolation for 15 years with undefeated enthusiasm we call for the strengthening of the resistance.

All of our cells and our consciousness are resistance positions against imperialism. In Anatolia, Syria, Palestine, Lebanon, Iraq, Latin America and every corner of the world we are with those who resist heart and soul. Every Free Prisoner is a tower of resistance in this war. And we take this strength and honour from not just the 122 martyrs of resistance to isolation but also from the peoples who resist. Imperialism is not invincible. We showed this with 122 times and we are continuing to show it every day and every moment. The Syrian people are showing it and in Palestine, Lebanon, Iraq, all the Middle East and Africa the resisting people are showing it.

The greatest strength of the peoples is righteousness and unity, those who resist and struggle against isolation should unite against imperialism.

History and the world's peoples will give full value to those who resist isolation and the effort and belief will be made concrete in the Symposiums.

Victory and the future will belong to the peoples of the world who resist imperialism.

With our greetings filled with enthusiasm and hope
