

Usak, 11.01.15

Hello,

the thick walls of fascism, its iron railings and isolation practices, no matter where on the world, are destined to melt against the revolutionary prisoners' fire of freedom. Those without imprisoned brains overcome all obstacles one by one, and no power can force down the thoughts of revolutionaries.

This is why we are participating in production today, beyond all pressures we under in a prison.

We write, paint pictures, we research and read.

Because dialectic states that while life is completed with new knowledge added, it is also renewed at the same time.

For this, even imprisoned as fighting for the victory of socialism, while we produce despite all impossibilities inside, with one side we are in the midst of the struggle with all the poor people in the world.

And we see that imperialism bullying against poor people is increasing every day a little more.

Here, the peoples of Middle East are covered with blood for years.

As long as Imperialism and its collaborators exists, their pain will not stop.

So with greeting your symposium, as free prisoners we cry out once more:

Down with Imperialism!

Long Live the Struggle of the People! ...
